PRESIDENTS REMARKS

As you read this the fall meeting will be close to being history with elections, rides, membership and a variety of other topics discussed. Look for full details in the November newsletter.

As the days get shorter and the nights get longer the recurring weekday rides are quickly ending. We still have a month of Sunday rides lined up and mountain biking starts Saturday, October 1st. We are actively seeking mountain biking ride leaders for Saturdays in October, then on Sundays from November 6th until the snow flies. Please contact me or Lenny if you're interested.

Howard

MARK YOUR CALENDARS Saturday evening, Nov 5th, is the NSC's annual party and will be held at the Lyceum restaurant, Church Street in Salem MA. The cost will be \$20 per person with the club generously subsidizing the remainder. Appetizers and a cash bar will be available at 6:30 with dinner and dancing to follow. This has always been a wonderful evening and all are invited to attend; however, we are limited to 100, so please send your checks in soon to:

SAFETY REMINDERS

When riding at this time of year it is more important to keep in mind the diminishing daylight.

- Wear bright colored jerseys/jackets/vests
- Have a blinking red LED light on the rear of your bike and unobstructed
- Dress in layers or bring a jacket for when the temperatures start dropping
- Don't rely solely on sunglasses even if it's sunny. The roads get darker when they are tree lined
- Be conscientious of wet leaves on the roads

WEEKLY RIDE SCHEDULE

These rides occur each week as listed during the road season. They will be back in the spring. Non-members are always welcome on all NSC rides.

Tuesday *** Starts 6:00PM through September***

New Start Location is **Union Congregational Church**, North Reading. Leader: Jimmy White (978) 689-9847 jdwhite.2@netzero.com, Peter McCann (781) 245-8115 mccann_peter@yahoo.com

The Tuesday Night ride accommodates both experienced paceriders at 18-21 MPH as well as novice to intermediate riders at 14-17 MPH. It is a hilly 15 mile ride that provides a good conditioning workout in an hour or less thru the Harold Parker State Forest yet is minutes from Rt. 128 and I-93. We always have someone to pair you off with so no one rides alone. Try us out!

Directions: From Rte 128 take Exit 40. Follow Haverhill Street 3.5 miles north to North Reading center. Continue straight across Rte 62 and turn left on Hill St; the second street on the left and just after the Union Congregational Church. Park in the upper church parking lot; take your first left on Hill St. From I-93, Take Rt. 62 EAST to Haverhill St, (cross Rt. 28 to North Reading H.S.), left on Haverhill, 2nd Left on Hill St., left into Church parking lot.

Wednesday *** Start time 5:00 PM ***

Topsfield Plaza, Topsfield. Leaders: Eric Shaktman (603) 580-1010 ericnsc@verizon.net & Marie Doyle (978) 777-4455.

Average pace for these 18-35 mile rides ranges from 15-21 mph; multiple groups, sometimes even a tandem pacerline! Length depends on daylight. An alternate shorter route is available each week. Cue sheet and map. Mix of flat, rolling, and hilly terrain. Routes vary from week to week. Bring \$\$\$ for pizza after ride.

Directions: From Rte 95 N, take Exit 50 to Route 1 North. In Topsfield, turn left onto Rte 97 North. At Topsfield Center, go left (Rte 97 continues right). Topsfield Plaza lot is a block ahead on the right...we park at the far end of the lot.

Thursday *** Starts at 6:00 PM Sharp***

Wakefield Center, Wakefield. Leaders: Tom Keane huknpuf@aol.com 781-477-0834 and Steve Winslow (781) 397-6893.

Beginner, intermediate. Leisurely ride, 10-13 mph. Less than 20 miles. This is a joint ride with Bike-to-Sea. The focus is on cycling in a group. Cue sheet.

Directions: Rte 128 to Exit 40. Follow Rte 129 south (Wakefield) to the south end of the lake. Meet at or near the gazebo.

SATURDAY ROAD RIDES

Note: Saturday rides go throughout the year as long as the roads are rideable. There is no fixed route. They may follow old Sunday ride arrows or go somewhere of interest to the leaders or other participants. Rain, snow cancels.

Masconomet Regional High School, Boxford. Start time 9:00am mid September through mid November. Leaders: Mike Habich (978) 664-0187 mhabich@astseals.com and Jeff Turpel (978) 356-6241 jaturpel@verizon.net. Maps? Cue sheets? Arrows? Nope. Directions to Masco: From Route 95, take Exit 51 (Endicott St) east towards Topsfield. The school is 1/4 mile on right. The ride leaves from the parking lot (at the far end from I-95).

WELCOME NEW MEMBERS!

Elaine Fearnley - Newburyport
Melanie Meeker - Newburyport
Hillary Benson - Haverhill
Erin Cumming - Topsfield
Richard Davis & Family - Beverly
Charles Fowler - Hampton, NH
John Takis - Georgetown
Ann Rakovic - Natick

What to expect: Come ride as we wind our way through Salem for some haunted happenings. We have no planned agenda, but a costume is always a fun way to celebrate Halloween. Use your imagination! Join us - we've had many laughs when we've done this ride in the past.

LACTATE THRESHOLD (PART 3)

With permission, this is excerpted from a series of articles written by Exercise Physiologist Dr. Stephen Seiler. Visit his website at <http://home.hia.no/~stephens/exphys.htm>

Interpreting the Data

For purposes of interpretation, let's say that an athlete had a maximal heart rate of 182, and a VO₂ max of 61 ml/min/kg. These were also determined using a bicycle test. So they are good values for comparison. Looking at the green dots, we see that blood lactate concentration does not begin to increase until during the 4th workload, from a concentration of about 1 mM to 2.5 mM. This is the break point. The subject's VO₂ was 45 ml/min/kg at this point. So we determine that his LT occurs at 45/61 or about 74% of VO₂ max. If we look at the heart rate at this point, it is 158. Now we have a heart rate at lactate threshold. 158 = about 85% of his max heart rate. This is useful for the athlete. When he is cycling, he can judge his training intensities based on this important value. If he is a time-trialist, this would approximate his racing heart rate for the hour long event.

So, Do I race at My LT Intensity?

This depends on your race duration. If you are rowing 2000 meters, running a 5k race etc., your exercise intensity will be well above the AT. Consequently, the blood lactate measured after an event is extremely high in elite athletes; on the order of 15mM (resting levels are below 1 mM). In races lasting from 30 minutes to 1 hour, well trained athletes also perform at an intensity above LT, but by a smaller margin. It appears that in these events, top performers achieve what might be termed a "**maximal lactate steady state**". Blood lactate may increase to 8 to 10 mM within minutes, and then stabilize for the race duration. A high but stable lactate concentration may seem to contradict the idea of the LT. But, remember that blood lactate concentration is the consequence of both production and clearance. It seems likely that at these higher lactate concentrations, uptake by non-working muscles is optimized. At any rate, measurements in cyclists, runners and skiers demonstrate the fact that elite performers can sustain work levels substantially above the LT for up to one hour.

Specificity of the Lactate Threshold

It is important to know that the lactate threshold is highly specific to the exercise task. So if this cyclist tries to get on his brand new, previously unused, rowing machine and row at a heart rate of 158, he will quickly become fatigued. Rowing employs different muscles and neuromuscular patterns. Since these muscles are less trained, the cyclist's rowing LT will be considerably lower. This specificity is an important concept to understand when using heart rate as a guide in "cross training activities", as well as for the multi-event athlete.
